**Société Française d' Acoustique**  
**Groupe Aéro- et Hydro- Acoustique**

## **1<sup>st</sup> Greek-French Workshop on Computational Aspects of Acoustic Wave Propagation**

**Heraklion, Crete 20-21/9/2006**

**Institute of Applied and Computational Mathematics (FORTH)**

**Chairmen: Michael Taroudakis (HELINA)  
Philippe Blanc-Benon (SFA)**

The scope of the workshop is to bring together experts of acoustic propagation problems in order to present and discuss their recent developments on computational methods for determining the acoustic field in case of indoor – outdoor and underwater acoustic propagation. The interaction of acoustic and seismic wave propagation is another area supported by the workshop.

The workshop will be held in Heraklion, Crete. Venue of the workshop will be the Foundation for Research and Technology-Hellas. The workshop will be sponsored by the **Institute of Applied and Computational Mathematics** and will follow the Greek National Conference on Acoustics to be held on 18 & 19 September 2006.

Presenters of the workshop will be encouraged to submit their work in the Journal “ACTA ACUSTICA united with ACUSTICA”. The papers will follow the standard reviewing process of the journal and the accepted papers will appear all-together in a special issue to be published during 2007.

More details on abstract submission, registration and accommodation in Heraklion during the workshop will be announced in due time. Scientists wishing to participate in the workshop should indicate their interest by sending e-mail to the workshop secretary. Thus, they will be kept informed on any news available.

Workshop topics: Computational Aspects on

- Atmospheric Acoustics
- Room Acoustics
- Underwater and Hydro-Acoustics
- Seismics

Deadline for the reception of abstracts (200 words maximum)  
Notification of acceptance:

**1, July 2006.**  
**20, July 2006.**
